

**ABSORBENT GARMENT CLOSURE SYSTEM HAVING NON-LINEAR
FASTENING**

ABSTRACT

A fastener tab for use on an absorbent garment is provided. The fastener tab has a tab body with a proximal edge for locating proximate the garment, a distal edge opposite the proximal edge, a top edge adjacent the proximal edge, and a bottom edge opposite the top edge, and a fastening area for removeably fastening the tab body to the garment. The fastening area has a first edge. A first tangent line is tangent to a first portion of the first edge of the fastening area, a second tangent line is tangent to a second portion of the first edge of the fastening area, the second tangent line intersects the first tangent line, and one of the first and second tangent lines is non-parallel to a primary pull direction of the fastener tab.
